

The image is a composite graphic. In the upper left, two GRACE satellites are shown in a tandem configuration, orbiting the Earth. The satellites have gold-colored bodies and large blue solar panel arrays. The Earth is depicted as a large, detailed sphere with blue oceans, white clouds, and brown/green landmasses, occupying the right half of the image. In the bottom left corner, three smaller spheres show global gravity maps, with colors ranging from blue (low gravity) to red (high gravity).
