

Intergraph Licensing 11.11.1 Issues Resolved

	CR #	Summary	Description / How to Reproduce	Originating Product/Platform
1.		License Service Configuration	Changes were made to the License Administrator and Setup to handle upgrades between versions and reinstallations so that a customer's existing license service will continue to operate in an uninterrupted fashion.	IMAGINE
2.		Multiple version licensing in License Administrator	Changes were made to the License Administrator to properly handle license servers that serve up multiple versions of the same product.	IMAGINE
3.		Addition of policy files	Policy files were added for all SxS and .NET components to allow for product patches without requiring products to rebuild.	GeoMedia
